

This listing of claims will replace all prior versions and listings of claims in the application.

Please note that these claim changes are identical to those previously submitted with Amendment (B) filed on November 30, 2005, but are re-submitted because Applicants are uncertain whether the Amendment was entered.

LISTING OF CLAIMS

1 -6. (Cancelled)

7. (Currently Amended) A reactor for generating moisture, having an inlet side and an outlet side, comprising:

a first reactor structural component on the inlet side of the reactor having an outside wall;

a second reactor structural component on the outlet side of the reactor having an outside wall, wherein the first and second components are mated ~~for to~~ form a reactor shell having an interior space;

a material gas supply passage provided in the first reactor structural component disposed to supply material gases into the interior space;

a material gas supply joint connected to the material gas supply passage;

a moisture gas outlet passage provided in the second reactor structural component to lead out moisture from the interior space;

a moisture gas take-out joint connected to the moisture gas outlet passage;

fin base plates attached to the outside walls of the first and second components; ~~and~~

a plurality of fins disposed on the fin base plates;

a heater, having an outside, disposed on the outside wall of the second component; and

a heater pressing plate, having an outside, disposed on the outside of the heater, wherein the fin base plate is attached to the outside of the heater pressing plate.

8. (Cancelled)

9. (Currently Amended) A reactor for generating moisture according to claim 7 wherein said ~~heat dissipation~~ fins are disposed symmetrically about the material gas supply joint.
10. (Cancelled)
11. (Currently Amended) A reactor for generating moisture according to claim 7 wherein said ~~heat dissipation~~ fins are disposed symmetrically about the moisture gas take-out joint.
12. (Cancelled)
13. (Original) A reactor for generating moisture according to claim 9, wherein said fins are axially symmetrical about said material gas supply joint.
14. (Cancelled)
15. (Original) A reactor for generating moisture according to claim 9, wherein said fins are axially symmetrical about said moisture take-out joint.
16. (Cancelled)
17. (Original) A reactor for generating moisture according to claim 9, wherein said fins are centrally symmetrical about said moisture take-out joint.
18. (Cancelled)
19. (Currently Amended) A reactor for generating moisture according to claim 7, wherein said ~~heat dissipation~~ fins comprise surfaces treated with alumite.
20. (Cancelled)
